

NATIONAL PARTNER PROGRAM

## Reduce project costs – increase revenues nationwide

- Managed project supply
- Optimized pricing & predictability
- Flexible scheduling & product breadth
- Compressed timelines
- Total project cost efficiency

### We offer a managed approach to steel supply

New Millennium's National Partner Program brings a managed approach to the nationwide supply of your structural steel joists, decking and beams. The program assures that these major structural steel elements are price-optimized and supplied to meet the dynamic delivery requirements of each project schedule.

A central objective of the program is to fully leverage the engineering, detailing, production and delivery capabilities of our company to compress the timeline for each project, while improving total project cost and performance.

### Program Contacts:

**Seamus Robins**  
National Accounts Sales Manager  
seamus.robins@newmill.com  
214-695-5548

**Chasity Hand**  
National Accounts Supervisor  
chasity.hand@newmill.com  
260-469-4330

## Advantages:

### Managed project supply

- Designated account manager and single point of contact
- Coordinates on all projects from pricing through completion
- Oversees company-wide supply schedules for each project
- Participates as a knowledgeable member of your team

### Optimized pricing & predictability

- Volume based material sourcing and pricing
- Locked-in pricing for controlled fiscal forecasting
- Shared ownership of risk in the event of metal market fluctuation
- Synergistic production and delivery cost/price advantage

### Flexible scheduling & product breadth

- Dynamic manufacturing adjusts to changing project timelines
- Nationwide engineering, detailing and production
- Steel joists, special profile steel joists, steel decking
- Flex-Joist™ Tension-Controlled Joist Design

### Compressed timelines

- Proactive management of the entire supply-side timeline
- Detailing, engineering, production, and shipping
- Analysis, expediting and compression of each segment
- Managed and accelerated RFI and approval process
- Supply timeline compression for earlier project occupancy

### Total project cost efficiency

- Design assistance for increased building performance at lower costs
- BIM based steel joist design and experienced process management
- Integrated building system engineering approach

**NEW MILLENNIUM**  
BUILDING SYSTEMS

**Building a better steel experience.**
